Summary

Senior Software Engineer with 8 years of expertise in developing **scalable APIs** and **cloud-native systems**. Proficient in **Python**, **FastAPI**, and **PostgreSQL**, with strong skills in **AI-driven automation** and **Kubernetes**. Experienced in **CI/CD**, **RAG** workflows, and metrics-based debugging, delivering high-performance backend solutions. Proven track record in mentoring teams, and optimizing code for efficiency and reliability.

SKILLS

- AI-driven automation
- Cloud-native systems
- Technical leadership
- Mentoring junior engineers
- Scalable data models
- API development
- Database management
- System design
- Continuous integration and deployment
- Advanced debugging
- Code quality assurance
- Temporal scheduling
- Python
- PostgreSQL
- Fast API
- S3 Storage
- Performance optimization
- PySpark
- Git Actions
- Kubernetes architecture

Experience

Senior Software Engineer, 09/2020 — Current

314e IT Solutions India PVT LTD — Bengaluru

- Implemented **CRM** and **ATS** applications with enhanced security and scalability using FastAPI and PostgreSQL.
- Optimized and managed **database** performance through advanced query tuning.
- Led the integration of AI features using **ChatGPT** and **Gemini AI** for automation.
- Streamlined deployment processes with **CI/CD** pipelines, improving release efficiency.
- Managed **Keycloak** authentication with IDP, and token-based authorization for secure access control.
- Enhanced system **reliability** by integrating robust notification services and APIs, like **Novu**.
- Integrated **Temporal.io** workflows to orchestrate long-running processes with fault tolerance and reliability.
- Integrated **Slack APIs** for automated alerts, deployment notifications, and workflow triggers.
- Developed and integrated **Google Cloud APIs** for cloud storage, authentication, and data processing.
- Designed scalable data models, automated schema migrations, and managed **Atlas DB schemas** efficiently.
- Built reliable email delivery pipelines via **SendGrid**, including bounce management, and analytics tracking.
- Implemented the **Elasticsearch**, **Vespa search** engine for full-text and vector search capabilities in high-scale data environments.
- Built Retrieval-Augmented Generation (**RAG**) pipelines, combining vector search and **LLMs**, for knowledge-driven responses.
- Mentored junior engineers, fostering a culture of best practices and continuous improvement.
- Containerized Python microservices using **Docker** and deployed them on **Kubernetes** clusters (GKE) for improved scalability and reliability.
- Established **coding standards** and guidelines to ensure consistency across development teams, using tools like Ruff, Pre-commit, SonarQube, etc.
- Conducted **code reviews** to uphold quality and maintainability of software projects.
- Configured **Cloudflare** DNS, caching, and Cloudflare Workers for API edge functions, and enhanced performance.
- Embedded **Chatwoot** for multi-channel chat support, enabling real-time user interaction and team response.
- Integrated **LiveKit** for video meetings and real-time collaboration features within web applications.

- Utilized **Grafana** and **PostHog** for performance monitoring, metrics visualization, and behavioral analytics.

Senior Software Engineer, 09/2019 — 08/2020

Express RCM Private Limited

- Developed **RESTful APIs** using **FastAPI** for Jeeves, a video- and PDF-based training platform.
- Integrated **Redis** caching and **RabbitMQ** message queues to enhance data processing speed, asynchronous workflows, and system reliability.
- Built and optimized **PostgreSQL** databases with indexing, query optimization, and performance tuning.
- Integrated third-party APIs to expand application functionality and improve user experience.
- Implemented **Celery** workers with **RabbitMQ** for distributed task execution and background processing.
- Investigated **production** issues reported by users and provided timely resolutions.
- Deployed software updates and patches to ensure **security** and functionality.

Associate Software Engineer, 07/2018 — 08/2019

Hotelsoft Inc — Bengaluru

- Developed software solutions for hotel data management systems using RESTful APIs, **FastAPI**, and **PostgreSQL**.
- Built and optimized backend logic for hotel rate optimization and **pricing** strategies.
- Worked on data manipulation, conversion, storage, and price calculations using **Pandas**.
- Designed and optimized APIs for data integration across multiple platforms.
- Built an application using **Java Spring Boot** and **Apache Camel** for seamless hotel data transformation.
- Worked on **XML/XSLT**-based data conversion to standardize incoming data formats.

EDUCATION

01/2018 New Horizon College of Engineering — Bengaluru

Master of Computer Application

LANGUAGES

English, Kannada

ACHIEVEMENT

- Second place - Company hackathon: optimized product with AI-powered voice assistant, translation, and summarization
- VTU University inter-college kabaddi tournament: led the team as the only MCA student among engineering students
